

Certificate

Product features

We hereby confirm that the

Ergo raised bed systems

correspond to the following characteristics:

Material

- High-quality polypropylene (PP, postconsumer PP), with good rigidity
- The utilized PP plastic raw material is completely recycled in origin
- The material used is 100% recyclable
- Heavy metal concentration of less than 100 ppm (according to Directive 94/62/EC)

Resistance

- UV-resistant
- Weather-proof
- Temperature-resistant, when installed: -22°F up to +113°F
- Resistant against nearly all organic solvents, fats and most acids and bases (please notice list of chemical durability)

Warranty 2 years

These raised beds are „Made in Germany“ and correspond to the current requirements of modern gardening products, regarding recycled raw material, manufacturing as well as ecologic sustainability. Colours may change. This is completely natural. It will not affect the product characteristics and does not give grounds for complaint.

Yours Otto Graf GmbH
